## WORK EXPERIENCE

**Software Developer, MT4 Networks** - april/2016 - present - Sao Paulo, São Paulo/Brazil

*MT4 Networks provides some innovative solutions on different areas, from software automation, CRM to IT Structure Management.*

- As a Backend-based developer, my role basically consists on maintaining legacy codebase, helping on coding new solutions and also helping our user base when they have some trouble with our apps. I'm also responsible for internship hiring and training, which I've implemented an efficient on-boarding training.
- On MT4, we've got our own Framework which acts alongside ZF and helps us on tasks from creating simple reports to IT Automation through bots and APIs.
- Tech stack: PHP 5x (Zend Framework and TDD tools), Linux, SVN/GIT Javascript (Dojo/Jquery), CSS3, Mysql/Oracle. Vagrant and Docker.

**Solutions Architect, Zupper** - February/2015 - March/2016 - Sao Paulo, São Paulo/Brazil

*Zupper is a Startup OTA (Online Travel Agency) Company which sells Flight Tickets to retail customers, with complete focus on user experience and unique service.*

- Lead developer and solutions architect, providing new features for Zupper (a product of Kontik-Franstur) website ([www.zupper.com.br](http://www.zupper.com.br)), responsible for both maintaining old features and developing new ones.
- At the time I worked on Zupper, our codebase consisted on a PHP application to sell flight tickets to customers and a PHP backend which manages all sales, with some integration with Salesforce and other brazilian payment gateways..
- Tech Stack: Mysql, PHP 5.5, MongoDB, GIT, AWS, CodeIgniter and Slim Framework, MySQL and PostgreSQL. Linux.

**Software Developer, ZAP Trade** - May/2011 - February/2015 - Santos, São Paulo/Brazil

*ZAP Trade is an IT Solution provider which has a variety of products, from ECM (Electronic Content Management) to tailored Corporate Solutions.*

- One of the lead developers of the project called "ZAP Porto sem Papel" (ZAP Port Without Papers), a product that helped a few container shipping companies to provide useful - and required - information to brazilian authorities (Federal Police and Government) through SOAP (XML) Web Services.
- Tech Stack: PHP 5x, C# and ASP.NET (Framework 3.5), Javascript, CSS, GIT/SVN/TFS.

## PREVIOUS EXPERIENCES

- **Jr. Business Analyst/Software Developer, BancoPAN** - Sep/2010 - Mar/2011 - São Paulo
